CHARACTER RENTAL

One of the types of passive income is the lease of your NFT characters.

Each NFT holder is able to choose from 3 types of lease:

1. Fixed Price. The owner sets the price and the term for which a character is leased, without the possibility of contract termination before its expiry date.
2. Share of profit. The owner sets a %, which he wants to get from the lessee's profits. The owner regulates lessee candidacies and can terminate the contract at any time.
3. Direct lease. The owner personally chooses the lessee candidacy, and sends a query directly.
